Pro-Vision offer the new AutoDomes from Bosch

Pro-Vision Distribution Limited, the national distributor of branded CCTV and Access Control equipment, have announced that they can now offer the latest additions to Bosch's impressive AutoDome cameras.

David Westwood, External Sales Manager for Pro-Vision told us, "Bosch have recently released a new range of competitively priced PTZ network HD domes for their AutoDome range in a choice of 720p25/30 or 1080p25/30. The 4000 HD Series offers the perfect combination of style and technology for internal installations that require high-quality imaging in a compact and aesthetic dome housing. Simple installation is assured with flexible in-ceiling or surface mounting options - plus full ONVIF Profile S and third party software support for easy integration with Video Management Systems (VMS)."

David added, "The 5000 HD Series provides 30x optical zoom with Bosch's imaging platform specially designed and tuned for accurate colour reproduction in scenes with varying lighting levels from day to night. Identification of people is possible up to 190m (623ft) without the loss of any detail. With PoE+ support this internal/external dome delivers high-speed PTZ control for tracking people and vehicles in large scenes. Plus exceptional low bit rates in static scenes save up to 50% of the storage cost compared to other equivalent domes."

"With integrated IR illumination for scenes with low or no ambient lighting, the 5000 IR Series domes provide long distance illumination up to 180m (590ft) for the easy detection and following of moving objects. Variable illumination ensures that IR light is uniformly distributed in the field to avoid dark spots or an over illuminated scene."

ENDS
