

Mirasys IP Surveillance Products

VMS, NVR/DVR, Video Analytics, ANPR and Virtual Matrix

upgrade to first class

Mirasys Pro Software

First class entry level IP Surveillance Solution

Features

- **VMS:** Single server IP recording and viewing software for up to 5 users and 50 cameras
- **Mobile:** Free Spotter Mobile application for iPhone, iPad and Android
- **Reliable:** Mirasys' unique non-fragmenting RAID0 video storage

Benefits

- Easy to set up and operate IP Surveillance software - reliable recording, virtual matrix and powerful search tool to find incidents quickly
- Fully featured solution, including all the main software components of Mirasys Enterprise
- Can be easily upgraded to Mirasys Enterprise as your surveillance requirements increase

Xact series

Versatile and fully integrated NVR/DVR for single or multi server surveillance systems

Features

- **VMS Versions:** Mirasys Pro, Mirasys Enterprise or Mirasys Hybrid
- **Scalable:** Up to 64 cameras per recorder and up to 100 recorders per system
- **Powerful:** Up to 575 fps @ 720p
- **Reliable:** Up to 12 Terabytes of cost effective non-fragmenting RAID0 storage

Benefits

- Pre-installed with easy to set up and operate Mirasys IP Surveillance software
- Ready to go video surveillance platform
- Cost effective Analogue to IP conversion
- Minimal impact in case of disk failure
- Powerful and reliable for a future proof investment

Mirasys Spotter for Windows

Integrate all your security products into our easy to use, customisable interface

Features

- **Easy to use:** Simple to set up, customise and search and export
- **Powerful:** Clear image quality and zoom facilities, which means you can look at a particular area in detail either automatically or via user controls
- **Flexible:** Ability to access video and data across multiple sites and control user access rights
- **Scalable:** Create multi-screen video walls with customisable and dynamic screen layouts driven by users or events

Benefits

- Any user can use this interface, as it is so intuitive
- Have control of all of your security products like Access Control and Intruder Detection in one easy to use system
- Create virtual views and regions of interest from a single camera

Mirasys Enterprise Software

Cutting-edge enterprise IP Surveillance Solutions

Features

- **VMS:** Up to 100 recorders and 6400 cameras in one centrally managed environment
- **Powerful:** Up to 64 cameras per server, 10 users and 5 servers with base licence
- **Customisable:** Plugins to enable multi-stream, multi-cast, two-way audio, Video Analytics, ANPR and management reports
- **Flexible:** Open platform architecture supports over 1400 IP camera models, Access Control, Intruder Alarm and Video Analytics from a wide variety of 3rd party partners

Benefits

- Easy to set up and operate IP Surveillance software - reliable recording, virtual matrix and powerful search tool to find incidents quickly
- Feature rich surveillance solution that scales easily
- Easy integration with 3rd party systems and devices

Xceed series

The world's most powerful IP/Hybrid Surveillance Solutions for highly demanding environments

Features

- **VMS Versions:** Mirasys Enterprise (optional Mirasys Hybrid)
- **Scalable:** Up to 64 cameras per recorder
- **Powerful:** Up to 575 fps @ 720p
- **Reliable:** Up to 45 Terabytes of RAID5 storage with redundant OS/application and power

Benefits

- Pre-installed easy to set up and operate Mirasys IP Surveillance software
- Highly scalable and powerful enterprise grade platform
- Minimise data loss and maximise recording continuity
- Built-in hardware redundancy

Mirasys Spotter for iPhone, iPad and Android

Mobile access to video and input/output controls

Features

- **Easy to use:** Free download from App stores provides an intuitive interface for viewing live camera or playback recordings
- **Powerful:** Clear image quality with flick to zoom facility
- **Fast:** Single tap to send snapshot via email
- **Flexible:** Ability to access across multiple sites

Benefits

- Any user can use this interface as it is so intuitive
- Have control of all of your security products like Access Control and Intruder Detection in one easy to use system
- Gives you control of your security anywhere, anytime

Carbon Video Content Analytics

iLids approved Video Analytics for surveillance and business intelligence

Features

- **Powerful:** Pre-packaged integrated analytics available per camera
- **Reliable:** Tested and approved for high-accuracy detection and recognition
- **Flexible:** Open platform integration with leading 3rd party analysis solutions

Benefits

- Enhanced video surveillance and monitoring performance
- Capture business events for reports and analysis
- Easy to enable integrated analytics or free drivers for 3rd party integration

Carbon ANPR

Making it easy to identify vehicles, manage access and monitor car parks

Features

- **Flexible:** Any camera connected to the Mirasys Enterprise VMS can be used with Carbon ANPR
- **Reliable:** Highly accurate recognition engine, supporting Roman and Arabic alphabets
- **Configurable:** Easy to use web-based license plate list-management and reporting engine

Benefits

- Easy integration with Access Control
- Fully integrated with the Mirasys Surveillance System
- Cost effective and reliable complete ANPR solution

Carbon Reporting

Statistics and trends. Valuable business intelligence

Features

- **Powerful:** Audit trail reports for system and user insights
- **Insightful:** Create custom reports based on Video Analytics such as dwell times or people counting
- **Functional:** Web based tool for designing 2D/3D graphical reports
- **Easy to use:** Pre-configured and customised reports are saved as bookmarks

Benefits

- Business intelligence reports for better and faster decision making
- Fact based operational reports to improve security
- Saves time and effort of having to create SQL reports from scratch
